

The right KOCHWAGEN® for all tastes

The KOCHWAGEN® comes in three different designs: the standard model KW100 (width 100cm) and the extra versions KW80 (width 80cm) and KW120 (width 120cm).

The chassis is made of high-strength, welded aluminium tubes whereas the side panels and doors are crafted from 3mm thick aluminium sheet. Chassis, side panels and doors are all covered with a protective powder coating. All assembly components used for the KOCHWAGEN® are fabricated in Germany or other European countries.

For the worktop we use assorted timber. It is up to you to choose between oak or beech wood. By default we use beech wood as multiplex board. On the one hand, oak impresses with its distinctive look and its solidness. On the other hand, it is subject to a natural process where it expands and shrinks and is therefore not torsion-resistant.

This is why we decided on beech wood to be our standard. Multi-bonded layers of beech wood constitute a board which is absolutely torsion-resistant, does not cup at normal use and thus will fully meet all your requirements.

The wooden surface of both oak and beech wood is treated with an environmentally friendly, multilayered hard oil and is then polished in several stages. The all-round handrail makes it easy to move the KOCHWAGEN® in any direction.

Depending on the size you choose, your KOCHWAGEN® comes with 2 up to 5 burners, all made of ceramic glass or stainless steel and topped off with a cast-iron grate. To prevent gas outflow, each single hob is equipped with a safety device. Renowned European producers account for the high quality of our hobs.

The partial lockable castor wheels with their abrasion-proof polyurethane surface have two merits: they are easy to move and at the same time they protect your floor from streaks.

Neither annoying cables nor rigid conduits impede your freedom to cook wherever you want. A portable standard gas cylinder is our simple yet practical solution for maximum flexibility. The KW80 can hold a 5kg cylinder whereas the KW100 and KW120 can optionally be loaded with a 11kg cylinder. Please take note that this will influence the weight of your KOCHWAGEN®.

more colour

The chassis, side panels and doors of the KOCHWAGEN[®] are by default powder-coated in jet black matt (RAL 9005). Optionally, a graphite grey* (RAL 7024) coating is available without additional charge.

graphite grey (RAL 7024)

jet black matt (RAL 9005)

If you wish to have other colours for the side panels and doors of your KOCHWAGEN[®], we are happy to offer a few additional options: at extra charge you can choose between ultramarine blue (RAL 5002), carmine red (RAL 3002) and maize yellow (RAL1006).

Please let us know if your favoured colour is not among these and we will find the right colour for you.

maize yellow (RAL 1006)

ruby red (RAL 3003)

ultramarine blue (RAL 5002)

* The colours depicted above serve as an orientation only as the shades on your print-out or monitor might differ from the original colours.

more space

We are happy to give you some extra space. Combine your chosen KOCHWAGEN[®] with a compatible serving trolley. As an extension to your worktop, the serving trolley BW80 comes with your chosen wood surface and with a width of 80cm.

With our concept of KOCHWAGEN[®] we make it possible for you to create your own kitchen unit in a new, lively and flexible way.
